BIBLIOGRAPHY

AREDS2 Publications

1. Economic Evaluation of a Home-Based Age-Related Macular Degeneration Monitoring System.
   Wittenborn JS, Clemons TE, Regillo C, et al.

2. Bivariate Analysis of Age-Related Macular Degeneration Progression Using Genetic Risk Scores.

3. Peripheral Retinal Changes Associated with Age-Related Macular Degeneration in the Age-Related Eye Disease Study 2: Age-Related Eye Disease Study 2 Report Number 12 by the Age-Related Eye Disease Study 2 Optos PEripheral RetinA (OPERA) Study Research Group.
   Writing Committee for the OPTOS PEripheral RetinA (OPERA) study (Ancillary Study of Age-Related Eye Disease Study 2).
   Domalpally A, Clemons TE, Danis RP, Sadda SR, Cukras CA, Toth CA, Friberg TR, Chew EY.

4. Optical Coherence Tomography Reflective Drusen Substructures Predict Progression to Geographic Atrophy in Age-related Macular Degeneration. Age-related Eye Disease Study 2 Ancillary Spectral Domain Optical Coherence Tomography Study Group.

5. Evaluation of Geographic Atrophy from Color Photographs and Fundus Autofluorescence Images: Age-Related Eye Disease Study 2 Report Number 11.

15. Methods and reproducibility of grading optimized digital color fundus photographs in the Age-Related Eye Disease Study 2 (AREDS2). AREDS2 Report No. 2. Danis RP,

AREDS2 Abstracts and Presentations

2. AREDS2 with Lutein/Zeaxanthin and Omega-3 Fatty Acids: Update. Chew EY.

3. **An approach to development and dissemination of patient recruitment materials for a large multi-center clinical trial.**
   McBee WL, Stein J, Chew EY, Clemons TE.

4. **Comparison of fundus autofluorescence images to digital color images for RPE atrophy in AREDS2.**
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort Lauderdale, FL, April 2008.

5. **Brightness, contrast, and color balance of digital vs. film retinal images in the Age-Related Eye Disease Study 2.**
   Hubbard LD, Danis RP, Neider MW, Wabers HD, Thayer DW, Age-Related Eye Disease Study 2 Research Group.
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort Lauderdale, FL, April 2008.

6. **Baseline nutritional characteristics of the Age-Related Eye Disease Study 2 (AREDS2) cohort.**
   Meleth AD, Gensler G, Clemons TE, SanGiovanni JP, Chew EY, Age-Related Eye Disease Study 2 (AREDS2).

7. **Association of cognitive function and depression with age-related macular degeneration in the Age-Related Eye Disease Study 2 (AREDS2).**

8. **Reproducibility of classification (AREDS severity scale and component features in AREDS2).**

9. **Changes from baseline to one year in fundus autofluorescence (FAF) images in the Age-Related Eye Disease Study 2 (AREDS2).**

10. **An online data entry certification process for a large multi-center trial.**
    Poster presentation at the 30th Annual Meeting of the Society for Clinical Trials, Atlanta, GA, May 2009.
11. A multi-level approach for retention of participants in a long-term clinical trial. 
   McBee WL, Clemons TE, Chew EY, SanGiovanni JP. 
   Presented at the 30th Annual Meeting of the Society for Clinical Trials, Atlanta, GA, May 2009

12. Demographic and dietary characteristics of the Age-Related Eye Disease Study 2 (AREDS2) participants and their associations with age-related macular degeneration (AMD). 
   Chang JR, Clemons T, SanGiovanni JP, Agron E, Chew E. 

13. Evaluation of precursors of geographic atrophy associated with age-related macular degeneration in the Age-Related Eye Disease Study 2 (AREDS2). 

14. Evaluation of age-related macular degeneration associated geographic atrophy from stereoscopic color fundus photographs and fundus autofluorescence images. 

15. Evaluation of age-related macular degeneration associated geographic atrophy from stereoscopic color fundus photographs and fundus autofluorescence images. 

16. The Effects of Clinical Turnover on a Large Multi-Center Trial. 
   Jones KR, Watson V, McBee W, Clemons TE, Chew EY. 
   Poster presentation at the 31st Annual Meeting of the Society for Clinical Trials, Baltimore, MD, May 2010.

17. An Examination of Site Visit Data Audit Results Compiled during the Initial Four Years of a Long-Term Clinical Trial. 
   McBee WL, Clemons TE, Chew EY, SanGiovanni JP. 
   Presented at the 32nd Annual Meeting of the Society for Clinical Trials, Vancouver, BC, May 2011.

18. Effective Monitoring Strategies in a Long-term Clinical Trial with Varying Levels of Clinic Staff Knowledge: The AREDS2 Experience. 
   McBee WL, Schenning S, Clemons TE, Chew EY, SanGiovanni JP. 
   Presented at the 33rd Annual Meeting of the Society for Clinical Trials, Miami, FL, May 2012.

19. Tracking of regulatory documents in a large clinical trial, The Age-Related Eye Disease Study 2 (AREDS2). 
   Schenning S, McBee WL, Clemons TE, Chew EY, SanGiovanni JP. 
   Presented at the 33rd Annual Meeting of the Society for Clinical Trials, Miami, FL, May 2012.
AREDS2 Collaborative Manuscripts

1. **Brightness, contrast, and color balance of digital vs film retinal images in the Age-Related Eye Disease Study 2.**
   Hubbard LD, Danis RP, Neider MW, et al.

2. **Spatial correlation between hyperpigmentary changes on color fundus photography and hyperreflective foci on SDOCT in intermediate AMD.**

3. **Macular pigment imaging in AREDS2 participants: an ancillary study of AREDS2 subjects enrolled at the Moran Eye Center.**

4. **Spectral-domain optical coherence tomography characteristics of intermediate age-related macular degeneration.**
   Leuchen JN, Schuman SG, Winter KP, McCall MN, Wong WT, Chew EY, Srivastava S, Sarin N, Clemons T, Harrington M, Toth CA.
AREDS Publications

Manuscripts

1. Authored by The Age-Related Eye Disease Study Research Group [Full list is in Arch Ophthalmol 2004;122:716-726].

13. Potential public health impact of the Age-Related Eye Disease Study results. AREDS Report No. 11.

15. Associations of mortality with ocular disorders and an intervention of high-dose antioxidants and zinc in the Age-Related Eye Disease Study. AREDS Report No. 13.

17. Correlation analysis of the In-clinic and Telephone batteries from the AREDS Cognitive Function Ancillary Study. AREDS Report No. 15.

19. The Age-Related Eye Disease Study severity scale for age-related macular degeneration. AREDS Report No. 17.

20. A simplified severity scale for age-related macular degeneration. AREDS Report No. 18.

21. Risk factors associated with the incidence of age-related macular degeneration in the Age-Related Eye Disease Study (AREDS). AREDS Report No. 19.

22. The Relationship of Dietary Lipid Intake and Age-Related Macular Degeneration in a Case-Control Study: AREDS Report No. 20.

23. Centrum use and progression of age-related cataract in the Age-Related Eye Disease Study (AREDS): a propensity score approach. AREDS Report No. 21.

   Archives of Ophthalmology. 2007;125(9):1225-1232.

   Archives of Ophthalmology. 2008;126(9): 1274-1279.

37. Changes in lens opacities on the age-related eye disease study grading scale predict progression to cataract surgery and vision loss: age-related eye disease study report no. 34.
Indaram M, Agrón E, Clemons TE, Sperduto RD, Wong WT, Ferris FL 3rd, Chew EY; Age-Related Eye Disease Study Research Group.

38. Long-term effects of vitamin C and E, β-carotene, and zinc on age-related macular degeneration. AREDS Report No. 35.
Chew EY, Clemons TE, Agrón E, Sperduto RD, SanGiovanni JP, Kurinij N, Davis MD; Age-Related Eye Disease Study Research Group.

39. Ten-Year Follow-up of Age-Related Macular Degeneration in the Age-Related Eye Disease Study: AREDS Report No. 36.

40. The Association of Dietary Lutein plus Zeaxanthin and B Vitamins with Cataracts in the Age-Related Eye Disease Study: AREDS Report No. 37.

AREDS Collaborative Manuscripts

1. Complement Factor H polymorphism in Age-Related Macular Degeneration.

2. Association between dietary glycemic index and age-related macular degeneration in non-diabetic participants in the Age-Related Eye Disease Study.
Chiu CJ, Milton RC, Gensler G, Taylor A.

3. High dose zinc increases hospital admissions due to Genitourinary Complications.
Johnson AR, Munoz A, Gottlieb JL, Jarrard DF.

4. Evaluation of clustering and genotype distribution for replication in genome wide association studies: The Age-Related Eye Disease Study.
5. Common variation in the SERPING1 gene is not associated with age-related macular degeneration in two independent groups of subjects.

6. Dietary Compound Score and Risk of Age-Related Macular Degeneration in the Age-Related Eye Disease Study.

7. Does eating particular diets alter the risk of age-related macular degeneration in users of the Age-Related Eye Disease Study supplements?

8. Progression of geographic atrophy and genotype in age-related macular degeneration.

9. Genome-wide association identifies SKIV2L and MYRIP as protective factors for age-related macular degeneration.

Abstracts and Presentations

1997
1. Evaluation of cortical and PSC lens opacities from fundus camera reflex photographs.

2. Evaluation of a two-phase enrollment design: experience of the Age-Related Eye Disease Study.

4. **Quality control of photographic grading.**  
   Poster, Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO),  

5. **Lens photographic grading system.**  
   Poster, Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO),  

1998

6. **AREDS extension of the Wisconsin age-related maculopathy grading system.**  
   Davis MD, Klein R, Magli YL, Ansay SE, Armstrong JR, Ferris FL, Hubbard LD, Neider  
   MW, King WN for Age-Related Eye Disease Study (AREDS) Research Group.  

7. **AREDS extension of the Wisconsin age-related maculopathy grading system.**  
   Poster, Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO),  
   May 1998.

8. **Development and valuation of a food frequency questionnaire in a randomized trial of eye diseases.**  

1999

9. **Baseline nutritional status of AREDS participants.**  
   Poster, Gensler GR and the AREDS Research Group.  

2000

10. **Recruitment of married couples in AREDS.**  
    Poster,  
    *Society for Clinical Trials*. Apr 2000.

11. **The NEI Visual Functioning Questionnaire: experience of the AREDS, Visual Functioning Assessment in Clinical and Observational Research.**  
    Clemons T and the AREDS Research Group.  
    Rockville, MD, Nov 2000.

2001

12. **A program designed to provide and maintain training in a large long-term clinical trial.**  
    McBee WL and the AREDS Research Group.  
    Poster, 22nd annual meeting of Society for Clinical Trials, Denver, CO, May 2001.  
    *Controlled Clinical Trials*. 22(2S), pp. 86S-87S.

13. **Incorporating a cognitive function ancillary study in an ophthalmic clinical trial.**  
    Lindblad AS and the AREDS Research Group.  
    Poster presented at the 22nd annual meeting of Society for Clinical Trials, Denver, CO,  

14. **Study Design and Baseline Characteristics.**  

15. **Classification of Lens Outcomes.**  
16. Classification of AMD Outcomes.

17. Adverse Effects of Antioxidants and Zinc.

18. Effect of Antioxidants and Zinc on Cataract.

19. Effect of Antioxidants and Zinc on AMD.

22. Is cholesterol a risk factor for progression to advanced AMD?
   Seddon JM, Chew EY, Klein R, Clemons TE, and the Age-Related Eye Disease Study (AREDS) Research Group.

2002

23. Cognitive function in the Age-Related Eye Disease Study (AREDS).

24. Effect of antioxidant and zinc supplements on progression of diabetic retinopathy in the Age-Related Eye Disease Study (AREDS).

25. NEI-VFQ in the Age-Related Eye Disease Study (AREDS).
   Lindblad AS, Clemons TE, Bressler SB, Chew EY, and the Age-Related Eye Disease Study (AREDS) Research Group.

26. The effect of cataract surgery on progression to advanced AMD.
   Martin DF, Gensler G, Klein BEK, Klein R, Chew EY and the Age-Related Eye Disease Study (AREDS) Research Group.

27. The seven-year incidence and progression of cataract in the Age-Related Eye Disease Study (AREDS).
28. The effect of antioxidant and zinc supplements on change in drusen size/area in the Age-Related Eye Disease Study (AREDS).
Chew EY, Davis MD, Seddon JM, Clemons TE, Hubbard LD, and Age-Related Eye Disease Study (AREDS) Research Group.

29. Public health impact of the Age-Related Eye Disease Study (AREDS) AMD Results.
Bressler NM, Friedman DS, Congdon NG, Seddon JM, Klein R, and the Age-Related Eye Disease Study AREDS Research Group.

30. The Results of the Age-Related Eye Disease Study (AREDS).

2003

31. Do antioxidants or zinc affect cognitive function in an older population?
Kurinij N, Clemons TE and The Age-Related Eye Disease Study (AREDS) Research Group.

32. The effect of cataract surgery on progression to advanced AMD.

33. Dietary omega-3 long chain polyunsaturated fatty acids and risk for age-related macular degeneration.

34. Risk factors for progression to advanced AMD.

35. Risk Factors for the Incidence of Advanced Age-Related Macular Degeneration in the Age-Related Eye Disease Study (AREDS).
Martin DF, Bressler NM, Bressler SB, Chew EY, Clemons TE, Klein R, Seddon JM, and Age-Related Eye Disease Study (AREDS) Research Group.

36. Responsiveness of the NEI-VFQ in the Age-Related Eye Disease Study (AREDS).
Lindblad AS, Bressler NM, Bressler SB, Clemons TE, Klein R, and Age-Related Eye Disease Study (AREDS) Research Group.

46. A randomized, controlled trial of antioxidants and zinc and the impact on cognition in the elderly: The AREDS ancillary trial.
Yaffe K, Clemons TE, McBee WL, Lindblad AS, Bressler SB.

47. AREDS Update I: The effect of cataract surgery on progression to advanced AMD.

48. AREDS Update II: Mortality and Nutritional Risk Factors.

2004

49. Ocular risk factors for developing neovascular AMD in the fellow eyes of patients with unilateral neovascular AMD.
Bressler S, Bressler NM, Clemons T, Ferris FL, Milton RC, Klein R, Klein B, Age-Related Eye Disease Study (AREDS) Research Group.

50. Dietary carotenoids and risk for age-related macular degeneration in the Age-Related Eye Disease Study.

51. Cognitive function in the Age-Related Eye Disease Study (AREDS) (poster).
Chew EY, Clemons TE, Klein ML, Klein BEK, Friberg T, Bressler S, Age-Related Eye Disease Study (AREDS) Research Group.

52. Centrum use and progression of age-related cataract in the Age-Related Eye Disease Study (AREDS) - A propensity score approach.
Milton RC, Clemons TE, Sperduto RD, Klein BEK, Age-Related Eye Disease Study (AREDS) Research Group.

53. Estimated rates of progression to advanced AMD and vision loss by baseline maculopathy status: Results from the Age-Related Eye Disease Study (poster).
Lindblad AS, Clemons TC, Seddon JM, Friberg TR, Klein R, Klein BEK, Bressler SB, Age-Related Eye Disease Study (AREDS) Research Group.
54. Illustration of the AMD severity scale from the Age-Related Eye Disease Study (poster).
Armstrong J, Davis MD, Gangnon RE, Lee L-Y, Klein R, Klein BE, Milton RC, Ferris FL, 
Hubbard LD, Age-Related Eye Disease Study (AREDS) Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, Apr 2004.

55. Effect of antioxidant supplementation on blood plasma thiol redox status in AREDS 
participants with early to late ARMD.
Moriarty SE, Openo K, Lynn M, Bressler S, Gensler G, Jones DP, Sternberg P, Age-
Related Eye Disease Study (AREDS) Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, Apr 2004 and 27th Annual Macula Society Meeting, Las Vegas, NV, 

56. Associations between c-reactive protein and age-related macular degeneration.
Seddon JM, Gensler G, Milton RC, Klein ML, Rifai N.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, Apr 2004.

57. Risk factors for the progression of lens opacities in the Age-Related Eye Disease Study 
(AREDS) (poster).
Clemons TE, Klein BEK, Sperduto RD, Age-Related Eye Disease Study (AREDS) 
Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, Apr 2004.

58. Clinical features and natural course of drusenoid pigment epithelial detachments in age-
related macular degeneration (poster).
Klein ML, Ferris FL, Gensler G, Davis MD, Armstrong J, Chew EY, Bressler SB, Gottlieb 
J, Friberg TR, Age-Related Eye Disease Study (AREDS) Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, Apr 2004.

59. Substitution of a telephone battery for an in-clinic assessment of cognitive function: 
correlation analysis from the AREDS Cognitive Function Ancillary Study.
McBee WL, Rankin MW, Clemons TE, Age-Related Eye Disease Study (AREDS) 
Research Group.
25th Anniversary Meeting of the Society for Clinical Trials (SCT), New Orleans, LA, 

60. Antioxidant supplementation prevents the oxidation of blood plasma cysteine/cystine 
redox status in elderly subjects.
Moriarty SE, Openo K, Lynn M, Bressler S, Gensler G, Jones DP, Stemberg P, Age-
Related Eye Disease Study (AREDS) Research Group.

2005

61. Reticular drusen as a baseline risk factor for progression to advanced AMD in AREDS.
Armstrong JR, Davis MD, Danis, RP, Klein R, Klein BE, Lee L, Elledge J, Whitehead J., 
Age-Related Eye Disease Study (AREDS) Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort 
Lauderdale, FL, May 2005.

64. Dietary lipids intake and incident advanced Age-Related Macular Degeneration (AMD) in the Age-Related Eye Disease Study (AREDS). SanGiovanni JP, Chew EY, Clemons TE, Seddon JM, Klein R, Age-Related Eye Disease Study (AREDS) Research Group. Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort Lauderdale, FL, May 2005.

69. Retinal risk factors and progression to geographic atrophy in Age-Related Macular Degeneration. Klein ML, Armstrong JR, Hwang TS, Ferris FL, Chew EY, Gensler GR, Seddon JM, Bressler SB

2006

71. A Dietary Antioxidant Index and Risk for Advanced Age-Related Macular Degeneration in the Age-Related Eye Disease Study.

72. The Effect of Cataract Surgery on the Development of Neovascular Age-Related Macular Degeneration (AMD).

73. Dietary Lipid Intake and Vision Loss in the Age-Related Eye Disease Study.
SanGiovanni JP, Chew EY, Agron E, Clemons TE, Seddon JM, Ferris FL, Age-Related Eye Disease Study (AREDS) Research Group.

74. Dietary Carbohydrate Intake and Glycemic Index in Relation to Age-Related Eye Disease Study.

75. The Progression of Age-Related Macular Degeneration in African-Americans Enrolled in the Age-Related Eye Disease Study (AREDS), Using the AREDS Simple Scale.

76. Is Cataract Associated With Cognitive Function? A Case-Control Study in the Age-Related Eye Disease Study (AREDS).

77. Dietary Carotenoids and Cataract in the Age-Related Eye Disease Study.

78. Dietary Lipids and Cataract in the Age-Related Eye Disease Study.
Lee LB, SanGiovanni JP, Chew EY, Agron E, Reed GF, Sperduto RD, Clemons TE, Seddon JM, Age-Related Eye Disease Study (AREDS) Research Group.
79. Dietary Carbohydrate Intake and Glycemic Index in Relation to Cortical and Nuclear Lens Opacities in the Age-Related Eye Disease Study.
   Taylor A., Chiu CJ (Tufts), Milton RC, Gensler G.

80. Cataract Risk Factors in a Subgroup of Patients Age 80 and Older From the Age-Related Eye Disease Study.
   Clemons TE, Sperduto RD, Age-Related Eye Disease Study (AREDS) Research Group.

81. Cataract Phenotyping Using Serial Examinations in the Age-Related Eye Disease Study (AREDS).
   Lindblad AS, Sperduto RD, Clemons TE, Ferris FL, Klein BEK, Age-Related Eye Disease Study (AREDS) Research Group.

2007

82. Visual Acuity Loss Associated With Advanced AMD Fundus Lesions and With the Simplified AREDS AMD Severity Scale.
   Chew EY, Clemons T, Milton R, Davis, MD, Ferris FL III, Age-Related Eye Disease Study (AREDS) Research Group.

83. Systemic Nsaids and Age-Related Macular Degeneration: The Age-Related Eye Disease Study (AREDS).
   Sen H, Chew EY, Agron E, Reed GF, SanGiovanni J, Ferris FL III.

84. The Age-Related Eye Disease Study (AREDS) Simple Scale: The Relation of the AREDS Simple Scale for AMD to Long-Term Progression to Advanced AMD and Reduced Vision.
   Clemons TC, Ferris FL, Chew EY, Davis MD, Age-Related Eye Disease Study (AREDS) Research Group.

85. AREDS2 with Lutein/Zeaxanthin and Omega-3 Fatty Acids: Update.
   Chew EY.

86. Dietary Glycemic Index is Related to Progression of Age-Related Macular Degeneration.
87. The Effect of Cataract Surgery on the Development of Geographic Atrophy.
Milton RC, Ferris FL III, Gensler GR, Ho M, Davis MD, Clemons TE, Chew EY, Age-Related Eye Disease Study (AREDS) Research Group.

88. Single Marker Associations of Nuclear-Encoded Mitochondrial Genes with Advanced AMD.
SanGiovanni JP, Chew EY, Clemons TE, Henning AK, Hoh J, Elashoff M.

89. Single Marker Associations of Cell Cycle Pathway Genes with Advanced AMD.
Vora A, SanGiovanni JP, Chew EY, Ajudua SN, Reed GF, Agron E, Henning AK, Clemons TE, Hoh J, Elashoff M.

90. Single Marker Associations of NFkB Pathway Genes with Advanced AMD.
Ajudua SN, Elashoff M, Chew EY, Vora A, Reed GF, Agron E, Henning AK, Clemons TE, Hoh J, SanGiovanni JP.

91. Progression of Geographic Atrophy as Measured by Digital Area; Results From the Age-Related Eye Disease Study (AREDS).

92. An approach to development and dissemination of patient recruitment materials for a large multicenter clinical trial.
McBee WL, Stein J, Chew EY, Clemons TE.

2008

93. A mitochondrial DNA haplogroup is associated with increased risk of advanced age-related macular degeneration.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort Lauderdale, FL, April 2008.

94. Association of mortality with AMD, cataract and high-dose antioxidants and zinc after long-term follow-up in the Age-Related Eye Disease Study.
Clemons TE, Chew EY, Milton RC, AREDS Research Group.
Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort Lauderdale, FL, April 2008.
95. Comparison of multiple predictive models for AMD susceptibility.
   Iyengar SK, Wang Y, Igo RP, SanGiovanni JP, Henning AK, Clemons TE, Chew EY.
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort
   Lauderdale, FL, April 2008.

96. C3 variant is associated with neovascular AMD and geographic atrophy in age-related
    macular degeneration.
   Kopplin LJ, Wang Y, Ajudua S, Igo Jr, RP, Chew EY, Clemons TE, Henning AK, Francis,
   PJ, Klein ML, Iyengar SK.
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort
   Lauderdale, FL, April 2008.

97. The use of statins and the development of AMD in AREDS.
   Cukras CA, Agron E, SanGiovanni JP, Clemons T, Ferris III FL, Chew EY.
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort
   Lauderdale, FL, April 2008.

98. Ten-year estimated progression rates to neovascular AMD and central geographic
    atrophy from the Age-Related Eye Disease Study (AREDS).
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort

2009

99. Effect of AREDS Supplements of High-Dose Antioxidant and Zinc, and Age-Related
    Macular Degeneration on Diabetic Retinopathy.
   Chew EY, Domalpally A, Clemons T, Danis R, SanGiovanni J, Gangaputra S, The Age-
   Related Eye Disease Study (AREDS).
   Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort

100. Advanced AMD and Variants in Elements of Omega-3 Lipid-Associated Signaling
    Pathways.
    SanGiovanni JP, Clemons TE, Agron E, Vora A, Chew EY.
    Annual Meeting, Association for Research in Vision and Ophthalmology (ARVO), Fort
